1 Seed of the Ground

The map style is defined by specifying the *seed* used to generate the terrain. In this study, eight random *seeds* were used, as mentioned in this article. As they conduct experiments using these random number *seeds*, each *seed* will now be referred to by an index, as indicated below:

- 0 -> 1.1.2.406811262
- 1 -> 1.1.1.525056537
- 2 -> 1.1.2.957507327
- 3 -> 1.1.2.1526552247
- 4 -> 1.1.2.600938443
- 5 -> 1.1.1.814907578
- 6 -> 1.1.1.1436422531
- 7 -> 1.1.1.1587462833

Table 1: Pairwise T test for *seed* factor using P value adjustment method ‘BH’

	6	2	4	7	1	5	0
2	0.320	-	-	-	-	-	-
4	0.200	0.017	-	-	-	-	-
7	0.394	0.056	0.678	-	-	-	-
1	1.4e-11	4.3e-14	2.1e-08	2.0e-09	-	-	-
5	3.9e-15	<2e-16	5.1e-12	4.3e-13	0.142	-	-
0	3.0e-12	8.5e-15	4.4e-09	4.0e-10	0.748	0.237	-
3	0.643	0.137	0.425	0.695	2.5e-10	4.4e-14	4.8e-11
